

**Really Cool Stuff**

<http://antixlabs.com/>

Discover some of the really cool and fun things you can do with AGP ...

Such as direct-to-TV game delivery ...

... or even direct to set-top-box, tablet & mobile phone  
and that super cool new device not yet invented!

Or configuring your mobile devices as controllers ...

... by sending a controller personality to the device

So you can play games on your big screen ...

... using your little screen  
as the controller!

With full controller functionality ...

... such as vibration and accelerometer support!

**You can save your game session and resume it later ...**

**... on the same device or one of your other devices!**

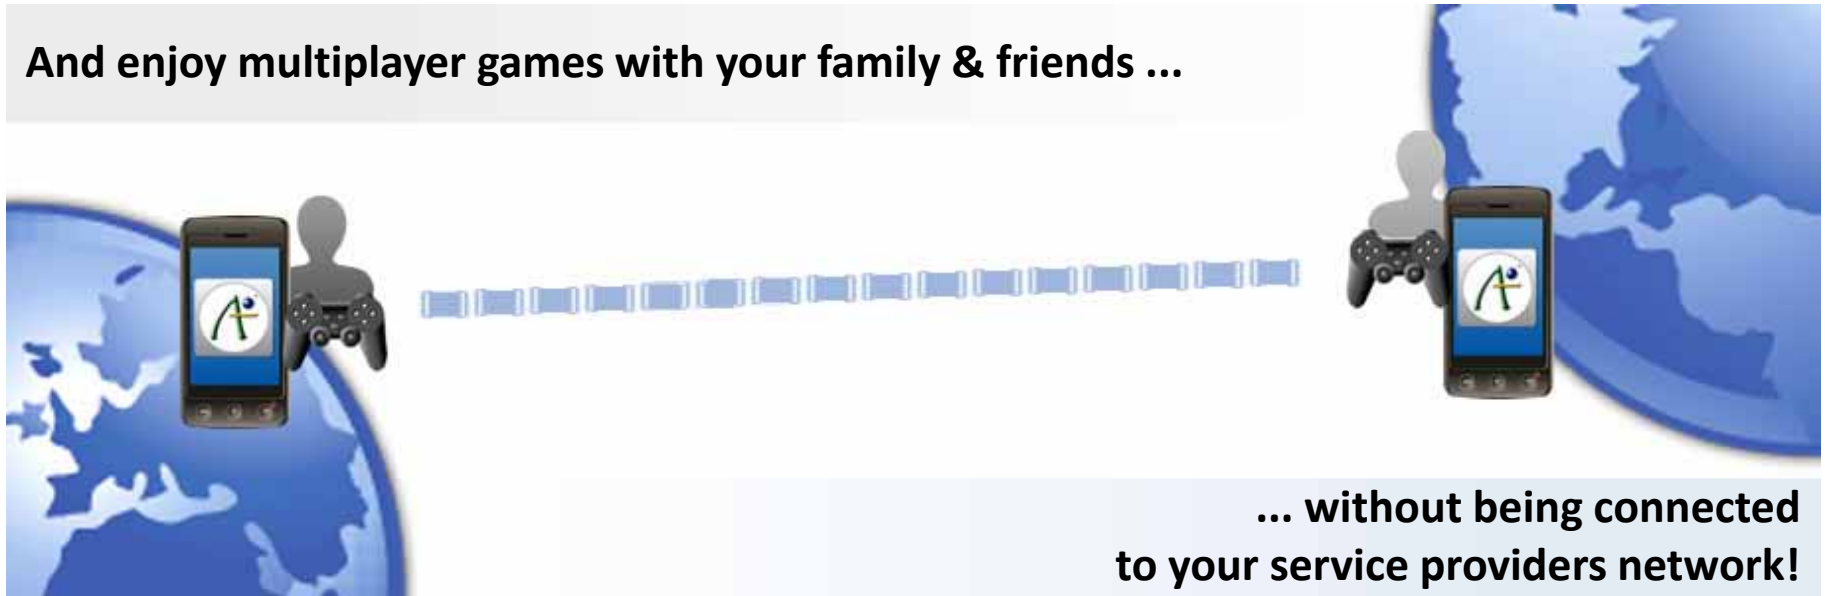

You can even send your game to another device ...

... using WiFi, Bluetooth, email, USB, SD Card or even a little Antix Link app!

**And enjoy multiplayer games with your family & friends ...**

In fact you can share and play games on any device in the home ...

... such as mobile phones, PCs, tablets, TVs!

You can browse and discover games on your TV screen ...

... or your mobile phone or PC  
or tablets!

And there's more too ...

... but we figured that's enough slides  
for a page in our website!
